Gender: Female **Date of birth**: 28/11/1992 **Nationality**: Italian

WORK EXPERIENCE

[01/02/2021 – Current] **Java Software Developer**

Gamma Innovation

City: Milan | **Country**: Italy

I work on an application that automates the real estate appraisal process used by business banking customers. I have developed various functionalities including customised access according to different user profiles, automated communication with providers on the market, billing process monitoring.

I mainly focus on the realisation of both SOAP and RESTful web services in Java using the Spring framework.

[01/10/2018 – 25/03/2020] **Systems analyst**

Minsait, an Indra company

I worked on the implementation of integration systems using the TIBCO BusinessWorks 6 platform. I developed and managed web services to integrate customer systems, including databases, SAP and TIBCO itself. In addition, I was responsible for migrating existing applications to the latest versions of TIBCO. Each development phase was detailed through the drafting of technical documentation.

EDUCATION AND TRAINING

[09/12/2020 – 22/01/2021] **JAVA developer professional course**

Gamma Innovation Academy

City: Milan | **Country**: Italy |

In this course I acquired skills for developing stack-based applications and methodologies to work within a software team developer operating in corporate contexts (banking, insurance and other industries).

I deepened my knowledge of various data structures such as Array, Linked List, Binary Tree, Hashmap, Hashset.

[13/04/2020 – 20/11/2020] **Web Programming with Python and JavaScript**

I learned how to build web pages using HTML and CSS, how to use Git and GitHub to keep track of changes to the code and collaborate with others. I gained a basic understanding of the Python language, how to manipulate its data types and build functions. I learned the use of Python's Django framework to create dynamic applications and I developed my web-design skills by working on several projects during the course. I used Django Models to communicate with databases using Python classes and objects.

[28/11/2018] **Bachelor's degree in Mathematics and Applications**

Università degli studi Milano Bicocca

City: Milano | **Country**: Italy | **Thesis**: Curves splines for graphic

I gained a solid preparation in the Mathematics disciplines: analysis, algebra, geometry, probability calculation, physics.

In my thesis I studied a class of functions, "*splines*", that are used in applications requiring data interpolation and smoothing. I built a mathematical model using Matlab to reproduce a desired shape starting from a set of points.

LANGUAGE SKILLS

Mother tongue(s): Italian

Other language(s):**English****LISTENING C1 READING C1 WRITING C1****SPOKEN PRODUCTION C1 SPOKEN INTERACTION C1****German****LISTENING B1 READING B1 WRITING B1****SPOKEN PRODUCTION B1 SPOKEN INTERACTION B1***Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user***JOB-RELATED SKILLS**

IT - skills

JAVA - Good knowledge

Spring Boot - Good knowledge

Web Services (SOAP & WSDL/RESTful) - Good knowledge

Postman - Good knowledge

Relational Database - Good knowledge

HTML, CSS - Basic knowledge

Python, Django - Basic knowledge

Angular JS - Basic knowledge

SOAP-UI - Basic knowledge

TIBCO ActiveMatrix BusinessWork 6 - Basic knowledge

COMMUNICATION AND INTERPERSONAL SKILLS

Communication and speaking

Strong interpersonal, verbal, and written communication skills thanks to my classical studies (ancient greek, latin, literature).

At Gamma Innovation, I participated in a public speaking course designed to further public speaking skills and creating presentations using digital tools such as audio, video, images, and specialized software. I studied the best ways to present a project depending on the context, with a focus on terminological accuracy, clarity and communicative effectiveness.

Problem solving

My studies in mathematics have provided me with a solid theoretical basis for understanding fundamental concepts such as algorithms, computational complexity and number theory. Thanks to this, I'm able to analyse complex problems in a methodical and structured way, breaking them down into more manageable and solvable steps. I like to find innovative solutions to the challenges I encounter along the way with creativity and curiosity.

Other skills

From early age I started to play piano, my great passion, and I obtained certifications both in theoretical music and in instrumental practice.

I recently participated in a theatre course that enriched my artistic sensibility. Now I have the confidence to perform on stage and to collaborate with my theatre group, with whom I've successfully staged a variety of plays.
